Empathy Map

Persona: **Priya, a second-year Engineering student** studying independently through an online learning platform, representing the target user of the Emotion Detection & Learning Support Engine.

SAYS	THINKS
• "I don't understand this recursion problem." • "This topic is too hard, maybe I should skip it." • "I finally got it — that makes sense now!"	• "Am I just not smart enough for this?" • "I wish someone could explain this differently, right now." • "I don't want to fall behind the rest of the class."

PERSONA: Priya — Self-paced Learner / Engineering Student

DOES	FEELS
• Re-reads the same notes and re-watches tutorial videos repeatedly. • Searches the web for alternate explanations instead of asking for help. • Switches tabs or closes the app when stuck for too long.	• Frustrated and anxious when concepts don't click quickly. • Confident and motivated after small wins on easier questions. • Bored and disengaged when material feels repetitive.
